Plan Impact Categories (for example)

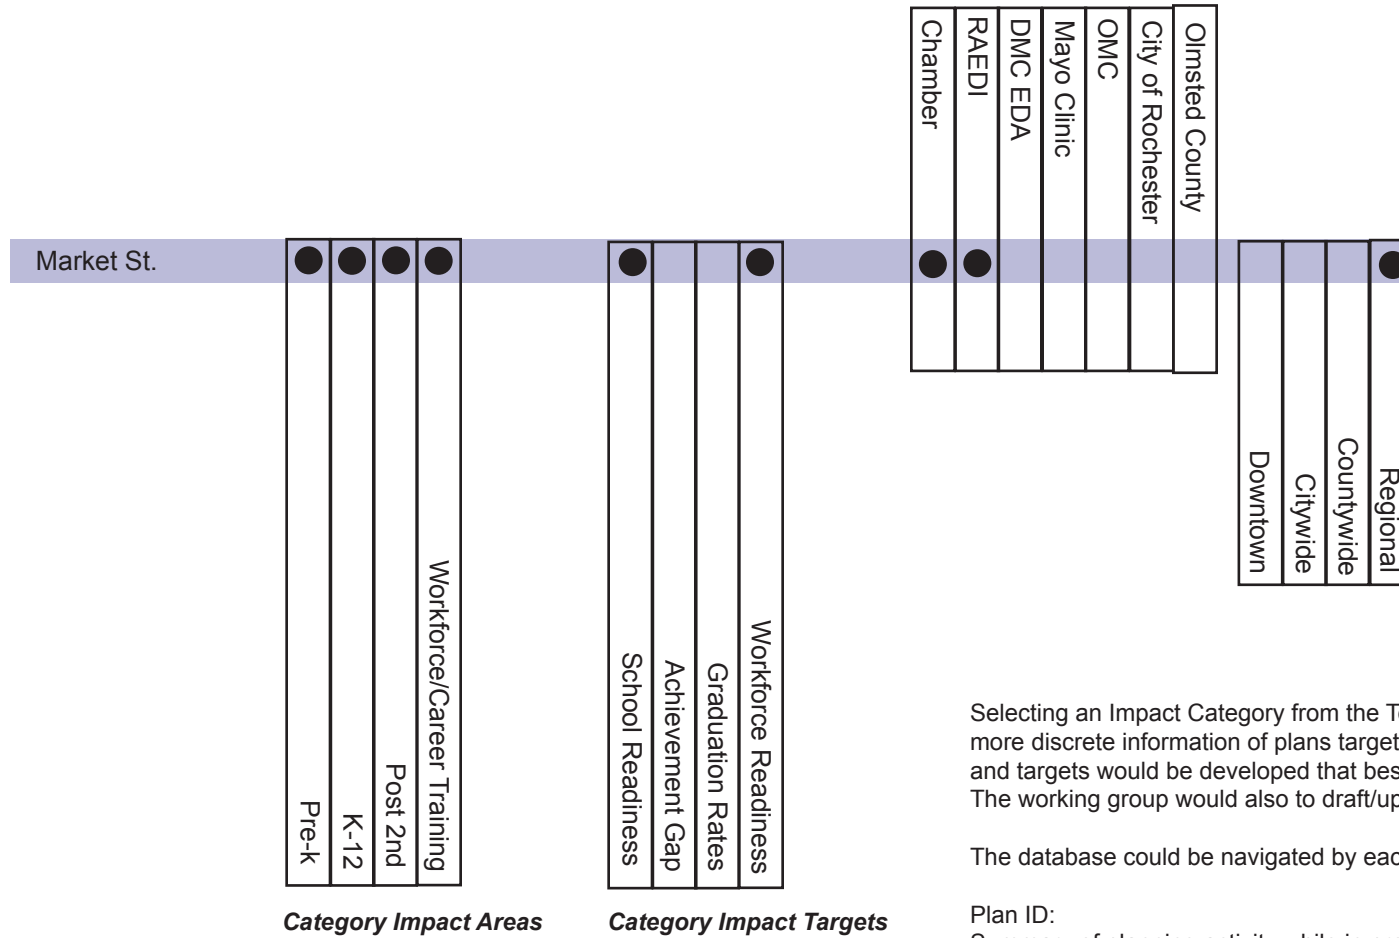

An initial list of planning activities

This planscape version illustrates how the grid would provide an overview of current planning activities. Plan ID, Author(s), and Scope as per each planning process and/or document.

Appropriate Plan Impact Categories would be developed that best suit the anticipated end users of the overview. At this level the descriptors would be broad. A working group should be formed to draft/update these descriptors.

- Market St. Economic Growth Plan
- DMC Plan
- Community Health Improvement Plan
- Downtown Master Plan
- Olmsted County General Land Use Plan
- ROCOG 2040 Long-Rang Transportation Plan
- Land Use Plan for the Rochester Urban Service Area
- Mayo Clinic Five Year Plan - Medical Institution Campus and Mayo Support Campus Special Districts
- UMR Planning
- Housing Planning
- Arts Planning
- Neighborhood Planning
- School District Planning
- etc.

Planscape - Level Two

Selecting an Impact Category from the Top Line display (e.g., EDUCATION) would provide more discrete information of plans targeting that category. As with the categories, areas and targets would be developed that best suit the anticipated end users of the overview. The working group would also to draft/update these descriptors.

The database could be navigated by each of the Top Line display coordinates:

Plan ID:

Summary of planning activity while in process, upon completion an executive summary and copy of plan.

Plan Impact Category:

All plans targeting the category with breakouts on more discrete impact areas and targets

Plan Author(s)

All plans with this authorship.

Plan Scope:

All plans with this scope
